

# COLLECT<sup>®</sup> Advanced Ship

***MSC COLLECT<sup>®</sup> Advanced Ship adds provides supply chain execution capabilities to help manufacturers and distributors streamline the shipping process, improve productivity and meet complex industry and customer requirements***

## **Systems that help you compete**

While smaller manufacturers and distributors may not need the complexity of an ERP application designed for their larger peers, they still need a solution that helps them compete for business in the demanding, global world of distribution.

MSC COLLECT<sup>®</sup> Advanced Ship gives small and midsized distributors and manufacturers the functionality needed to compete and win business in:

**Complex industries** – Industries like consumer packaged goods often have complex needs such as unique labeling, packaging and shipping requirements.

**Regulated industries** – Regulated industries such as automotive and those that handle hazardous materials need systems that help them stay in compliance.

**Distribution to large retailers** – Many large retailers have unique and stringent material handling and labeling requirements that need to be met in order for a distributor or manufacturer to maintain status as a preferred supplier.

**Global distribution** – Organizations that distribute goods abroad need systems that help them create all the necessary paperwork and ensure that nothing is missed.

## **Complete your ERP Solution**

MSC Collect<sup>®</sup> Advanced Ship allows organizations using an existing ERP system to meet their simple to complex shipping requirements while preserving their investment in business software.

## Increase productivity in the warehouse and in shipping

Increasing productivity in the warehouse is one way distributors and manufacturers can control costs and “do more with less.” MSC COLLECT WMS gives you tools that help you optimize activity in the warehouse including:

- **Pick plans optimized** for your business or products e.g. location sequence , heavy to light, and minimal picks – pallets, cartons or each.
- **Pick to pack** minimizes inventory movement in the warehouse and streamlines order shipments.
- **Wave pick with pack-out** increases the efficiency of picking small orders by allowing the picker to handle more than one order at a time.
- **License plating** increases the efficiency of transactions for pallets of goods and helps meet the labeling requirements for large retailers.

- **Shipping documentation made easy**  
COLLECT<sup>®</sup> Advanced Ship offers users a sophisticated shipping documentation capability that will both enhance and simplify the production of all needed shipping documents.
- Pack list for the end customer
- Bills of lading and manifest for the carrier
- NAFTA Certificate of Origin, Proforma / Commercial Invoice for customs clearance
- US Shippers Export Declaration to meet US Government regulations
- Shipper Letter of Instruction for freight forwarders
- And other regulatory documents such as the IMO Dangerous Goods Declaration
